SELECT THE RIGHT PARTNER FOR YOUR BUSINESS

MECHATRONICS INTEGRATED
SUPPLY CHAIN PROJECT

www.mechatronics.centroestero.org

Traditionally innovative

Piemonte is one of the most representative regions for the mechatronics sector in Italy and hosts a **highly organized and receptive technological district**. The region has a centuries-old industrial tradition. **The Italian automation is native to Torino and Ivrea** – respectively hometown of FIAT (presently part of Stellantis Group) and Olivetti (now IoT digital company of TIM Group).

This double-sided nature of mechanics and electronics leads to a **top mechatronic sector**, through which traditional and advanced production systems, machine tools and CMM coexist and interact on an ongoing basis. The main destination sectors are automotive, aerospace, railways, appliances, energy, textile, health, and home automation.
